Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

1. Claims 1-15, 18-22 and 39-41 allowed.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 16 and 17 rejected under 35 U.S.C. 103(a) as being unpatentable over Komoto (2001/0015443) in view of Baillie et al. (2004/0021407) further in view of Eida et al. (5,909,081)

Regarding Claims 16 and 17, Komoto discloses a semiconductor light emitting device of gallium nitride type mounted on a lead frame with a first and second encapsulators provided around the light emitting device. The paragraphs 14 and 15 state that the first encapsulator may be made out of inorganic adhesive preferable made of SiOH, SiO₂ or TiO₂. Komoto fails to disclose the required alkali earth metal structure and the required adhesive layer. However, Baillie et al. disclose luminous materials where in claims 3-5 and 38, the required alkaline material is disclosed. Furthermore, Eida et al. disclose a multi-color light emission apparatus with organic electroluminescent device where in Fig. 10, layer 13 is adhesive layer located on top of supporting body/substrate 11.

Art Unit: 2826

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required alkaline earth metal and the required adhesive layer in Komoto as taught by Billie et al. and Eida et al. respectively, in order to have a light emitting device with increased performance.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
